

ANSH PAWAR

SOFTWARE DEVELOPER

ianshpwr@gmail.com | +91 8571851175 | Panipat, Haryana | [LINKEDIN](#) | [GITHUB](#) | [LEETCODE](#)

SUMMARY

Software Engineer experienced in building AI-powered applications, multi-agent systems and scalable full-stack platforms using Python, FastAPI, React, Node.js and LangGraph. Skilled in RESTful API development, Retrieval-Augmented Generation (RAG), system design, backend development and data-driven applications.

PROFESSIONAL EXPERIENCE

SDE INTERN, WONDRR

OCT 2025 - FEB 2026

- Developed an Admin Portal used by 10+ partners to streamline management and tracking of 100+ trips.
- Automated batch processing workflows, reducing manual effort by 70% and improving scalability and operational efficiency.

PROJECTS

DejaView | AI-Powered Semantic Journal

[GITHUB](#) Nov 2025

- Built DejaView, an AI-powered journaling platform enabling memory-aware conversations through **Retrieval-Augmented Generation (RAG)** and secure **JWT-based authentication**.
- Designed a semantic search pipeline using **BGE-small-en embeddings**, **Cloudflare Vectorize** and **PostgreSQL**, exposed through **RESTful APIs** built with **Node.js**, enabling scalable vector retrieval and efficient data access.
- Integrated **Groq LLaMA** to generate personalized, context-aware responses from journal memories and conversation history, while optimizing retrieval workflows to reduce response latency.
- Engineered a full-stack architecture using **Next.js**, **Node.js** and **PostgreSQL**, following modular system design principles and improving scalability, maintainability, and user experience.

DataMitra | Multi-Agent Analytics Platform

[GITHUB](#) Apr 2026

- Built DataMitra, a **5-agent** AI analytics system that transformed raw CSV datasets into validated insights and ranked business recommendations in under 15 seconds through LLM orchestration and automated analytical workflows.
- Engineered a Critic Agent with **confidence scoring**, **automated retry logic** and output validation mechanisms to reduce **hallucinations** and improve response reliability across **multi-agent pipelines**.
- Implemented a dual-LLM architecture (**Llama-3.3-70B** and **Llama-3.1-8B**) that reduced token usage by ~60% through intelligent model routing, task specialization, and rule-based fallbacks.
- Developed an end-to-end analytics platform using **FastAPI**, **Streamlit**, **Polars**, and **DuckDB**, enabling high-performance data processing, **RESTful API** development and analysis of 4,000+ records in under **6 seconds**.

SKILLS

Languages: Python, JavaScript

Frontend & Backend: React.js, Next.js, Node.js, Express.js, FastAPI, RESTful APIs, Authentication, JWT

AI/ML: Generative AI, Retrieval-Augmented Generation (RAG), LangGraph, LangChain, NLP, Prompt Engineering, Multi-Agent Systems

Databases & Data Analytics: PostgreSQL, MongoDB, Neon, Cloudflare Vectorize, Pandas, NumPy, Polars, DuckDB

Tools & Platforms: Git, GitHub, GitHub Actions, Streamlit

Core Computer Science: Data Structures & Algorithms, OOP, DBMS, System Design

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence & Machine Learning)

2024 - 2028

Newton School of Technology, Rishihood University

ADDITIONAL INFORMATION

- Mumbai Hacks Finalist:** Selected among top teams for developing and presenting an innovative technology solution in a competitive hackathon.
- Peer Mentor, Newton School of Technology:** Mentored **35+** junior students on **academics**, **career guidance** and **technical development**.
- Cancer Awareness Camp:** Organized a cancer screening and awareness initiative that impacted 150+ participants.
